Comments: Location; Township 20S Range 17E Section 19; All points taken in (NAD27). Stream is identified as site # 11 west of Cotton Creek on the master map. U of A P-line was used for reference throughout surveys.

Stream characteristics: Site 11 is a large system that flows directly into the Duktoth River. 6-7m wide, 1-2m deep. Gravel substrate with pools. Site 11 has 3 tributaries. See excel sheet for GPS points and further description.

Stream surveys were part of the U of A Helicopter Cruise. Field crews surveyed streams for fish using baited minnow traps. Soak times for traps were usually less than 30 minutes per trap/ two traps per sample site. Captured fish were identified and released on-site. Field teams were comprised of ADF&G personnel.
